Rehab Considerations for Adults With Complex Medical Conditions in the ICU

INTRODUCTION

This session addresses rehab considerations for SLPs working with adult patients in the intensive care unit (ICU). Speakers discuss an overview of oxygen delivery methods, optimizing communication and dysphagia intervention for ICU patients, progressing patients with tracheostomy to successful decannulation, and maximizing outcomes for patients with complex medical conditions through multidisciplinary communication and collaboration.

This course is a recorded session from the 2021 online conference “Maximizing Outcomes for Medically Complex Patients of All Ages.”

LEARNING OUTCOMES

You will be able to:

- facilitate communication and dysphagia intervention options for adult patients in the ICU, and safely progress patients with tracheostomy to decannulation
- explain the importance of multidisciplinary collaboration to maximize outcomes for ICU patients

PROGRAM HISTORY and IMPORTANT INFORMATION

Recording length: 67 minutes
Online conference dates: March 17–29, 2021; August 4–16, 2021
End date: March 17, 2026

To earn continuing education credit, you must complete the learning assessment on or before March 17, 2026.

This course is offered for 0.1 ASHA CEUs (Intermediate level, Professional area).
