Ashwini Namasivayam-MacDonald, PhD, CCC-SLP, SLP(C), is a clinically trained SLP whose research specializes in understanding the determinants and consequences of swallowing impairments in older adults. Her goal is to produce clinically relevant research to inform frontline clinical practice. Her research currently focuses on dysphagia in people with dementia and identifying dysphagia-related caregiver burdens. In light of the pandemic, her work has shifted to consulting on adequate personal protective equipment for SLPs and identifying best practices for work in the acute care setting with patients presenting with COVID-19. She was a 2019 recipient of the ASHA Early Career Contributions in Research Award.
