Using Telepractice for Evaluation and Intervention for Neurogenic Communication Disorders

INTRODUCTION

SLPs across work settings face challenges associated with adapting their current evaluation and treatment methods to telepractice. This webinar will discuss adaptations and evidence-based practices for using telepractice to effectively assess and treat individuals with neurogenic communication disorders.

LEARNING OUTCOMES

You will be able to:

- Adapt and administer assessments and interventions using telepractice
- Identify potential barriers and troubleshoot technical challenges during telerehabilitation
- Incorporate evidence-based practice fundamentals into telepractice
- Identify appropriate tools to assess progress and ensure patient satisfaction with telepractice

PROGRAM HISTORY and IMPORTANT INFORMATION

Live webinar: September 9, 2021
3:00–5:00 p.m. Eastern time
