Speech Audiometry for Linguistically Diverse Populations

INTRODUCTION

The likelihood of encountering multilingual individuals, non-English-speaking individuals, and non-native speakers of English in the clinic is becoming more common. As audiologists are working with linguistically diverse populations, they may find themselves asking, “How should I evaluate speech perception in my patients who are not monolingual speakers of English? Which speech materials should I use?” This webinar will review the current literature on multilingual and non-native speech perception and discuss approaches to best serve patients from diverse linguistic backgrounds.

LEARNING OUTCOMES

You will be able to:

• Explain the challenges that non-native English speakers face when listening in noise
• List suggested guidelines for working with multilingual patients

PROGRAM HISTORY and IMPORTANT INFORMATION

Live webinar: December 8, 2021
2:00–4:00 p.m. Eastern time
(1:00 p.m. Central time, noon Mountain time, 11:00 a.m. Pacific time)

On-demand webinar: December 10, 2021–December 10, 2026

To earn continuing education credit, you must complete and submit the learning assessment within 5 days of watching the webinar, or before December 10, 2026, whichever comes first.

This course is offered for 0.2 ASHA CEUs (Intermediate level, Professional area).
