Hearing Health and Care During the COVID-19 Pandemic

INTRODUCTION

The articles in this journal self-study explore research related to various aspects of hearing health and care during the COVID-19 pandemic. Specific topics include: supporting individuals with tinnitus, teaching students about noise-induced hearing loss, and understanding pandemic-related disruptions to hearing abilities and care. Audiologists will take away information they can apply as the pandemic and audiology practice continue to evolve.

LEARNING OUTCOMES

You will be able to:
- Discuss ways to support individuals with tinnitus
- Discuss strategies for mitigating pandemic-related hearing disruptions
- Discuss considerations for implementing a hearing education program

CONTENTS

Coping With Tinnitus During the COVID-19 Pandemic, by Eldré W. Beukes, Joy Onozuka, Torryn P. Brazell, and Vinaya Manchaiah (https://doi.org/10.1044/2021_AJA-20-00188) ......................................................... 9 pages

Survey of Hearing Health During the COVID-19 Pandemic: Implications for Service Delivery, by Laura Gaeta (https://doi.org/10.1044/2020_AJA-20-00037) ................................................................. 4 pages
PROGRAM HISTORY and IMPORTANT INFORMATION

Articles originally published in American Journal Audiology
Start date: April 7, 2022
End date: April 7, 2027

To earn continuing education credit, you must complete and submit the learning assessment on or before April 7, 2027.

ASHA CE Provider approval does not imply endorsement of course content, specific products, or clinical procedures.

This course is offered for 0.4 ASHA CEUs (Advanced level, Professional area).
