Teleaudiology: An Introduction to Remote Services

INTRODUCTION

This course is the first in a set of practical programs that address specific aspects of remote practice (telepractice) in audiology. This initial course explores audiologists’ perceptions of barriers to providing telehealth services and introduces the Health Belief Model (HBM) and Transtheoretical model to assess readiness for remote service provision.

The course includes an on-demand recording and a worksheet activity/tool to help you identify needs and barriers as you consider how you can incorporate teleaudiology into your practice.

LEARNING OUTCOMES

You will be able to:

- Identify actual and potential barriers to providing remote services within practice settings and formulate solutions
- Identify the technological and operational needs to launch and scale a teleaudiology program and build an executable plan

PROGRAM HISTORY and IMPORTANT INFORMATION

- **Recording length:** 22 minutes
- **Activity time:** 10 minutes
- **Content originated:** May 2021
- **End date:** February 1, 2027

To earn continuing education credit, you must complete and submit the learning assessment by **February 1, 2027**.

ASHA CE Provider approval does not imply endorsement of course content, specific products, or clinical procedures.

This course is offered for **0.05 ASHA CEUs** (Introductory level, Related area).
