FACULTY

Angela Loucks Alexander, AuD, CCC-A, MNZAS, believes that auditory processing disorder needs a revolution. She was able to gain clarity on how to help individuals with auditory processing disorder through Jack Katz, PhD, CCC-A/SLP’s guidance. Angela worked with Katz for 7 years, between 2004 and 2012, building her knowledge and expertise in auditory processing disorder diagnosis and treatment. Through her online masterclasses with the Auditory Processing Institute, Angela trains her peers in the skills needed to provide effective auditory processing disorder diagnostic and therapeutic options. She aims to double the number of SLP/AuD professionals providing effective auditory processing services through the online Auditory Processing Disorder Master Courses by 2023.
