Teleaudiology: Translating Adult Hearing Care Remotely – Hearing Aid Services

INTRODUCTION

This course explores realistic scenarios audiologists may encounter when remotely fitting hearing aids for adults. The course discusses strategies for successful hearing aid fitting via teleaudiology and identifies challenges and how to address them when they occur.

The course is one in a set of practical programs that address specific aspects of remote practice in audiology.

LEARNING OUTCOMES

You will be able to:

- Describe the steps and considerations for completing a hearing aid fitting and addressing clients’ needs remotely
- Outline the key components of a successful remote hearing care appointment
- Discuss challenges and benefits of providing hearing aid services via telepractice
- Create a plan for translating in-person hearing aid services to a remote service delivery environment

PROGRAM HISTORY and IMPORTANT INFORMATION

Recording length: 31 minutes
Content originated: June 2021
End date: February 1, 2027

To earn continuing education credit, you must complete and submit the learning assessment by February 1, 2027.
