Effective Infection Control Strategies in Schools

INTRODUCTION

The COVID-19 pandemic has challenged school personnel to mobilize infection control strategies to protect the health of students, teachers, SLPs, and other school staff. This webinar will explore evidence-based strategies to improve infection control and promote health within school settings, with a focus on addressing the special needs of children with speech, language, and hearing considerations.

LEARNING OUTCOMES

You will be able to:

• Outline the basic principles of infection control within schools
• Identify safe cleaning and disinfecting products to reduce disease transmission
• Apply infection control methods to reduce risks and protect health within school settings

PROGRAM HISTORY and IMPORTANT INFORMATION

Live webinar: February 16, 2021
1:00–3:00 p.m. Eastern time
(noon Central time, 11:00 a.m. Mountain time, 10:00 a.m. Pacific time)
