FACULTY

Doris-Eva Bamiou, MD, PhD, FRCP, is a professor in neuroaudiology at the University College London (UCL) Ear Institute and consultant in audiovestibular medicine at UCLH and Great Ormond Street Hospitals. Her PhD is on auditory processing in patients with structural brain lesions. She received the Pat Jobson Prize of the British Association of Audiological Physicians (2002) and the Edith Whetnall prize of the Royal Society of Medicine (2012) for promoting the field of APD. She is the director and organizer of the APD advanced masterclass (UCL), programme co-director of the MSc in audiovestibular medicine (UCL), and editor of the eBrain Neuro-Otology section. Her research interests include clinical APD syndromes in normal subjects and after stroke, auditory treatment and rehabilitation for APD, interaction of cognition with audition and vestibular function, and customized balance rehabilitation.

Financial Disclosures:
- Professor in neuroaudiology at the UCL Ear Institute
- Coordinator for a H2020 project funded by OTICON
- Research support from PHONAK
- Financial compensation from ASHA for this presentation

Nonfinancial Disclosures:
- No nonfinancial relationships to the content of this presentation

Vasiliki (Vivian) Maria Iliadou, PhD, is an associate professor of psychoacoustics at the Medical School of Aristotle University of Thessaloniki, Greece. She is an ENT physician with a doctoral degree in audiology. She has established the first Auditory Processing Clinic in Greece for children and adults in AHEPA University Hospital, Thessaloniki. She is working toward bringing together clinicians and researchers involved in auditory processing disorders (APD) in Europe and beyond.

Financial Disclosures:
- Associate professor at the Aristotle University of Thessaloniki (AUTH)
- Financial compensation from ASHA for this and past presentations

Nonfinancial Disclosures:
- Involved in the European APD Study Group and the Greek APD Study Group
Benoît Jutras, PhD, is a full professor at the School of Speech-Language Pathology and Audiology and director of the audiology programs at the University of Montreal and researcher at the Research Centre, Pediatric CHU Sainte-Justine, Montreal. His research interests are mainly related to auditory processing disorder. He investigates the occurrence of auditory processing disorder with other disorders/impairments, such as dyslexia and hearing loss. He is also interested in the evaluation of the efficacy of interventions provided to children with auditory processing disorder.

Financial Disclosures:
- Full professor and program director at the University of Montreal and researcher at Pediatrics - CHU Sainte-Justine.
- Grant funding from the Ministry of Health - Quebec and the CRIR
- Financial compensation from ASHA for this and past presentations

Nonfinancial Disclosures:
- No nonfinancial relationships to the content of this presentation
