How to “Process” Central Auditory Processing Disorders

FACULTY

Gail J. Richard, PhD, CCC-SLP, has been at Eastern Illinois University for 36 years in communication disorders and sciences, including 14 years as department chair. She retired from the teaching faculty in May 2014 to serve as director of an Autism Center, conducting evaluations, consultations, and educational workshops. In 2015, she initiated a program for college students with autism spectrum disorder who were enrolled at the university, Students with Autism Transitional Education Program (STEP). She is a certified and licensed speech-language pathologist with expertise in childhood language disorders, including autism spectrum disorder, auditory/language processing disorders, selective mutism, executive functions, and language learning disorders. She has numerous clinical and scholarly publications, including The Language Processing Test and Differential Screening Test for Processing. Richard is an ASHA Fellow and has served in many leadership roles, including ASHA President in 2017.
