Supporting Early Infant Feeding in the NICU

FACULTY

Erin S. Ross, PhD, CCC-SLP, is the creator of the SOFFI Method, a holistic feeding program for caregivers in the NICU. Ross received her PhD from the University of Colorado at Denver and Health Sciences Center in 2007 and her master’s degree in speech and language pathology in 1988. She completed a 2-year post-doctoral fellowship in the Section of Nutrition, Department of Pediatrics, School of Medicine, University of Colorado Denver in 2009. Ross provides clinical consultation to several NICUs within HealthONE, Denver, in addition to providing professional education and research consultation through Feeding FUNdamentals, LLC. She is currently a clinical instructor in the Center for Family & Infant Interaction, University of Colorado Denver, and faculty at the Rocky Mountain University of Health Professions. In addition, Ross co-teaches the SOS Approach to Feeding (Kay Toomey). Ross’ research interests focus on understanding feeding and growth in the medically complex infant, and on identifying and treating feeding problems in infants and children. She brings more than 26 years of experience and provides a perspective that crosses over the initial hospitalization through the first 5 years of life.
