Case Studies in Cochlear Implants for Children

INTRODUCTION

This session explores pediatric patients, including determining cochlear implant candidacy and managing this patient population after they receive a cochlear implant. The session uses case examples to help clinicians generalize how they may be able to provide services to pediatric patients in their clinic or practice.

This course is a recorded session from the 2019 online conference “Audiology 2019: Cochlear Implants.”

LEARNING OUTCOMES

You will be able to:

- improve treatment plans for special needs populations
- identify patients with asymmetrical hearing loss who may be considered for cochlear implants

PROGRAM HISTORY and IMPORTANT INFORMATION

Recording length: 75 minutes
Online conference dates: September 11–23, 2019
End date: September 11, 2024

To earn continuing education credit, you must complete the learning assessment on or before September 11, 2024.

This course is offered for 0.1 ASHA CEUs (Intermediate level, Professional area).
