Providing Telehealth Services to Individuals With Cochlear Implants

INTRODUCTION

This session illustrates how telehealth/telepractice can enable professionals to make their services more easily accessible to clients with cochlear implants who are in poor health or live in remote areas where travel is a challenge.

This course is a recorded session from the 2019 online conference “Audiology 2019: Cochlear Implants.”

LEARNING OUTCOMES

You will be able to:
- describe how to implement and deliver a telehealth option for individuals with cochlear implants
- utilize telehealth to increase the quality of service for individuals with cochlear implants through team building, collaboration, and direct service

PROGRAM HISTORY and IMPORTANT INFORMATION

Recording length: 65 minutes
Online conference dates: September 11–23, 2019
End date: September 11, 2024

To earn continuing education credit, you must complete the learning assessment on or before September 11, 2024.

This course is offered for 0.1 ASHA CEUs (Intermediate level, Professional area).
