Head and Neck Cancer Management: Treatment Toxicities

INTRODUCTION

Head and neck cancer treatments affect functional speech and swallowing outcomes. This session explores treatment strategies, compensatory strategies, and roadmaps to improve speech and swallow function for patients who have received treatment for head and neck cancer.

This course is a recorded session from the 2019 online conference “Cancer Care: Enhancing Communication, Swallowing, and Quality of Life.”

LEARNING OUTCOMES

You will be able to:

• describe surgical and nonsurgical head and neck cancer treatment options
• discuss speech and swallow function following surgical and nonsurgical cancer treatments
• describe evidence-based speech and swallowing treatment, toxicities, and compensatory strategies in head and neck cancer patients

PROGRAM HISTORY and IMPORTANT INFORMATION

Recording length: 85 minutes
Online conference dates: March 20–April 1, 2019; August 7–19, 2019
End date: March 20, 2024

To earn continuing education credit, you must complete the learning assessment on or before March 20, 2024.

This course is offered for 0.1 ASHA CEUs (Intermediate level, Professional area).
