The SLP’s Role in Conversion Disorder

INTRODUCTION

Conversion disorder, also commonly known as functional neurological symptom disorder, is a complex and often misunderstood condition that can affect an individual’s communication, cognition, and movement. This webinar will explore all aspects of the psychological disorder, including etiology, symptoms, diagnosis, treatment, counseling, and related issues to inform the SLP’s assessment and treatment of the disorder. The speaker will also discuss the SLP’s role specifically in working with children and teens with the disorder as they complete treatment and return to school.

LEARNING OUTCOMES

You will be able to:
- explain the etiology and symptoms of conversion disorder
- tailor your treatment plans to decrease symptoms and decrease risk of relapse
- facilitate return to school for children and teens with conversion disorder, and help school professionals understand how best to assist students

PROGRAM HISTORY and IMPORTANT INFORMATION

Live webinar: Wednesday, October 30, 2019
2:00–4:00 p.m. Eastern time (1:00–3:00 p.m. CT; noon–2:00 p.m. MT; 11:00 a.m.–1:00 p.m. PT)
