Hearing Loss and Dementia

INTRODUCTION

The association between hearing loss and dementia has received significant press coverage recently. This webinar will explore this association and discuss clinical implications. The speaker will review the literature surrounding hearing loss and dementia to better describe the association, explain potential mechanistic pathways, and describe practical impacts on clinical practice.

LEARNING OUTCOMES

You will be able to:

- explain the statistical association between hearing loss and dementia
- describe the potential pathways linking hearing loss and dementia
- identify potential clinical implications of this relationship

This webinar is part of ASHA’s Carhart Series of Audiology Webinars, named in honor of the “father of audiology” and past ASHA president, Dr. Raymond Carhart. He expressed a love for the clinic and for practitioners who work hard each day to solve patients’ hearing and communication challenges. Reflecting Carhart’s spirit of curiosity and his appreciation for discovery and practical application, the series features expert speakers who use evidence-based decision-making to propose solutions to the top clinical dilemmas that audiologists face in daily practice.

PROGRAM HISTORY and IMPORTANT INFORMATION

Live webinar: Wednesday, October 9, 2019
3:00–5:00 p.m. Eastern time (2:00–4:00 p.m. CT; 1:00–3:00 p.m. MT; noon–2:00 p.m. PT)

On-demand webinar: October 11, 2019–October 9, 2020

To earn continuing education credit, you must complete and submit the learning assessment within 5 days of watching the webinar, or before October 9, 2020, whichever comes first.

To see if this program has been renewed after this date, please search by title in ASHA’s online store at www.asha.org/shop.

This course is offered for 0.2 ASHA CEUs (Intermediate level, Professional area).
