Person-Centered Assessment and Treatment for Adults Who Stutter

INTRODUCTION

This webinar will present assessment and treatment strategies that lead to personalized, functional, and meaningful outcomes for adults who stutter. The speaker will use video clips of person-centered approaches to diagnostic interviews and intervention sessions to illustrate key concepts.

LEARNING OUTCOMES

You will be able to:

- describe person-centered assessment approaches to identify goals that are realistic and lead to long-term change
- identify a variety of meaningful and functional treatment outcomes that are often important to adults who stutter
- describe two treatment activities to increase comfort and efficiency in an individual’s stuttering pattern
- describe two counseling strategies to support motivation and change
