

## FACULTY

---

**Holly Storkel, PhD, CCC-SLP**, is a professor in the Department of Speech-Language-Hearing: Sciences and Disorders and an associate dean in the College of Liberal Arts and Sciences at the University of Kansas. Her research focuses on how children learn the sounds and words of the language and how this understanding of learning can be applied to the development of effective clinical treatments. Storkel's prior clinical work was in a private practice setting with preschool and school-age children with developmental language disorders. She conducted research as an undergraduate and postdoctoral fellow with Dr. Judith Gierut, one of the main developers of the complexity approach to treatment of phonological disorders. Storkel also co-administers a Facebook group focused on clinical research for SLPs.

### *Financial Disclosures*

- Professor and associate dean at University of Kansas
- Financial compensation from ASHA for this presentation

### *Nonfinancial Disclosures*

- Administrator of a Facebook group for clinical research SLPs
