
Reframing Auditory Rehabilitation: Needs-Based Approaches Across the Life Span (SIG 7)

INTRODUCTION

This course features moderated discussions among a panel of clinicians who collectively provide cochlear implant auditory rehabilitation (AR) to patients of all ages. Topics and discussions demonstrate the need to expand and differentiate intervention approaches based on the unique needs of individual patients with cochlear implants. Panelists review recent studies, present translational applications, share case studies and examples, illustrate multidisciplinary professional roles, and discuss evidence-based assessment and treatment.

This course is part of the SIGnature Series, a collection of courses developed by volunteers from ASHA's Special Interest Groups, who share practical, evidence-based suggestions and solutions based on their in-depth knowledge, clinical experiences, and passion for their specialty areas. This course was developed by SIG 7: Aural Rehabilitation and Its Instrumentation.

LEARNING OUTCOMES

You will be able to:

- Compare, contrast, and measure the various rehabilitation needs and important outcomes for children and adults with cochlear implants
- Evaluate the effects of hearing loss on individualized skills important to functional auditory rehabilitation outcomes in patients with cochlear implants
- Create patient-centered intervention plans for auditory rehabilitation

PROGRAM HISTORY and IMPORTANT INFORMATION

Original program recording: October 2020

End date: October 1, 2025

To earn continuing education credit, you must complete and submit the learning assessment on or before **October 1, 2025**.

ASHA Professional Development is approved by the Continuing Education Board of the American Speech-Language-Hearing Association (ASHA) to provide continuing education activities in speech-language pathology and audiology. See course information for number of ASHA CEUs, instructional level and content area. ASHA CE Provider approval does not imply endorsement of course content, specific products or clinical procedures.

This course is offered for 0.2 ASHA CEUs (Intermediate level, Professional area).
