Graham Schenck, PhD, CCC-SLP, is a Craniofacial Speech Scientist at Gillette Children's Specialty Healthcare in St. Paul, Minnesota, and an Adjunct Professor in the Department of Communication Sciences and Disorders at the University of Wisconsin-River Falls. Schenck has more than 8 years of clinical and research experience in the area of cleft palate/craniofacial anomalies. He specializes in the assessment and treatment of resonance disorders, speech sound disorders, and dysphagia across the life span. Schenck's current research uses non-sedated MRI and 3D imaging to evaluate the velopharyngeal musculature in children with submucous cleft palate.
