
Attn Supervisors: Reframe Your Thinking About Cultural Diversity (SIG 11)

INTRODUCTION

This webinar will focus on the impact of diversity on the supervisory relationship and the importance of cultural competence in clinical supervision. Speakers will examine the influence that language, labeling, stereotyping, and implicit bias have on the supervisor and supervisee, as well as discuss strategies and techniques to improve cultural competencies for supervising SLPs and audiologists. The webinar will review the literature on diversity and cultural competence in supervision; discuss biases, power imbalance, cultural humility, and self-analysis; and include case studies and activities that provide supervisors an opportunity to consider their own cultural identity and ways in which this identity influences their supervisory alliance.

This webinar is part of the SIGnature Series, a collection of webinars developed by volunteers from ASHA's Special Interest Groups, who share practical, evidence-based suggestions and solutions based on their in-depth knowledge, clinical experiences, and passion for their specialty areas. This webinar was developed by SIG 11: Administration and Supervision.

LEARNING OUTCOMES

You will be able to:

- Identify the impact of language and stereotypes in supervisory relationships
- Describe three strategies to enhance cultural competence in supervision
- List your own cultural identities and discuss their influence while working with supervisees
- Define cultural humility, responsiveness, and competence and how they relate to clinical supervision
