Artificial Intelligence (AI) and Hearing Technology of the Future

INTRODUCTION

There is no question that emerging technologies such as embedded sensors and artificial intelligence are changing the hearing health landscape. This session will look ahead to the coming decade and explore innovations in hearing health care technology, strategy, and service. The speaker will discuss practical ways to leverage these innovations to be successful in today’s and tomorrow’s dynamic market landscape.

This course is a recorded session from the 2020 Audiology Online Conference “Evolving Clinical Practice: Present and Future Considerations.”

LEARNING OUTCOMES

You will be able to:

• list at least two ways that the hearing health care landscape will likely change in the next decade and how you can prepare
• list at least two ways that artificial intelligence can help improve patients’ hearing health outcomes
• list at least two ways that embedded sensors can help improve patients’ hearing health outcomes

PROGRAM HISTORY and IMPORTANT INFORMATION

Recording length: 52 minutes
Online conference dates: November 11–23, 2020
End date: November 11, 2025

To earn continuing education credit, you must complete the learning assessment on or before November 11, 2025.

This course is offered for 0.05 ASHA CEUs (Intermediate level, Related area).
