Providing Evidence-Based Clinical Services for Tinnitus

INTRODUCTION

This session will describe evidence-based strategies for tinnitus assessment and management. The speaker will discuss specific tools and processes to help audiologists provide the best services to manage tinnitus along with hearing loss or reduced sound tolerance (hyperacusis), since many individuals who experience tinnitus also experience these other challenges.

This course is a recorded session from the 2020 Audiology Online Conference “Evolving Clinical Practice: Present and Future Considerations.”

LEARNING OUTCOMES

You will be able to:

- conduct a brief audiologic assessment of patients reporting tinnitus
- administer and interpret the Tinnitus and Hearing Survey to assist in clinical decision-making for patients reporting tinnitus
- describe the different types of reduced sound tolerance and how treatment differs for each

PROGRAM HISTORY and IMPORTANT INFORMATION

Recording length: 110 minutes
Online conference dates: November 11–23, 2020
End date: November 11, 2025

To earn continuing education credit, you must complete the learning assessment on or before November 11, 2025.

This course is offered for 0.15 ASHA CEUs (Intermediate level, Professional area).
