Tips and Tools for Auditory Rehabilitation in Any Practice Setting

INTRODUCTION

The provision of comprehensive auditory rehabilitation services is critical to successful patient outcomes, yet many audiologists focus primarily or exclusively on amplification due to time, reimbursement, and compliance challenges. This session will clearly define the components of auditory rehabilitation and provide specific strategies and tools to help overcome challenges.

This course is a recorded session from the 2020 Audiology Online Conference “Evolving Clinical Practice: Present and Future Considerations.”

LEARNING OUTCOMES

You will be able to:

- define aural rehabilitation, and describe the widely recommended components of an effective aural rehabilitation program
- identify local and national resources that can provide education and support for patients with hearing loss
- describe strategies for overcoming challenges related to the provision of aural rehabilitation services in a busy clinical setting

PROGRAM HISTORY and IMPORTANT INFORMATION

Recording length: 55 minutes
Online conference dates: November 11–23, 2020
End date: November 11, 2025

To earn continuing education credit, you must complete the learning assessment on or before November 11, 2025.

This course is offered for 0.05 ASHA CEUs (Intermediate level, Professional area).
