Assessment Techniques for Adults With Traumatic Brain Injury

INTRODUCTION

This session discusses various testing options for assessing adults and adolescents with TBI, including self-report measures, standardized assessments, and functional evaluation procedures. The speaker uses clinical case examples across these testing domains to illustrate the usefulness of the tools and how they can help alleviate assessment challenges clinicians often face.

This course is a recorded session from the 2020 online conference “Maximizing Functional Outcomes for Individuals With Traumatic Brain Injuries.”

LEARNING OUTCOMES

You will be able to:

- select relevant self-report measures for patients with mild–severe traumatic brain injury
- evaluate the effectiveness of standardized assessment measures for use with individuals with traumatic brain injury
- identify functional testing procedures available to clinicians working with adolescents and adults with traumatic brain injury

PROGRAM HISTORY and IMPORTANT INFORMATION

Recording length: 71 minutes
Online conference dates: March 18–30, 2020; December 2–14, 2020
End date: March 18, 2025

To earn continuing education credit, you must complete the learning assessment on or before March 18, 2025.

This course is offered for 0.1 ASHA CEUs (Intermediate level, Professional area).
