Navigating the SLPs Role in Concussion Management

INTRODUCTION

This session discusses the current SLP practice recommendations when it comes to assessment and intervention for concussion/mild TBI, including how SLPs can integrate into interdisciplinary care models. The speaker also discusses considerations related to hearing and auditory processing after mild TBI.

This course is a recorded session from the 2020 online conference “Maximizing Functional Outcomes for Individuals With Traumatic Brain Injuries.”

LEARNING OUTCOMES

You will be able to:

- state anticipated acute concussion recovery rates for children, adolescents, and adults
- identify the different areas of cognitive-communication that may be impacted by mild TBI
- identify three unique strengths of SLPs in concussion management

PROGRAM HISTORY and IMPORTANT INFORMATION

Recording length: 70 minutes
Online conference dates: March 18–30, 2020; December 2–14, 2020
End date: March 18, 2025

To earn continuing education credit, you must complete the learning assessment on or before March 18, 2025.

This course is offered for 0.1 ASHA CEUs (Intermediate level, Professional area).
