Mary R. T. Kennedy, PhD, CCC-SLP, is Professor and Chair, Communication Sciences and Disorders at Chapman University, Orange, Calif. She is an ASHA Fellow and a recipient of Honors from the Academy of Neurologic Communication Sciences and Disorders. Kennedy has years of clinical and research experience working with individuals with cognitive impairments after brain injury, such as metacognition, self-regulation, and executive functions, and has co-authored numerous publications on evidence-based practice. Her current work involves identifying the challenges that are self-reported by college students with executive function problems, especially those with brain injury including mild TBI or concussion. Her book, *Coaching College Students with Executive Function Problems*, provides SLPs, educators, and rehabilitation professionals with current best practices and tools that support these students using dynamic coaching, an approach based on scientific evidence and clinical experience.

**Financial Disclosures:**

- Financial compensation from ASHA for this presentation
- Royalties from Guilford Publishing for authoring *Coaching College Students with Executive Function Problems*

**Nonfinancial Disclosures:**

- Author of publications on executive functions, metacognition, and evidence-based practices for working with adults with TBI
