Functional Treatment Approaches: Beyond Workbooks

INTRODUCTION

Too often, therapeutic progress that happens in a clinical setting does not translate to real-world gains. This session discusses various strategies to create and implement functional treatment plans for patients with TBI to capitalize on their strengths and increase independence in real-world settings.

This course is a recorded session from the 2020 online conference “Maximizing Functional Outcomes for Individuals With Traumatic Brain Injuries.”

LEARNING OUTCOMES

You will be able to:
- identify barriers to and create solutions for translating clinical gains to real-world settings for adults with TBI
- evaluate current intervention practices and identify areas of improvement to enhance functionality
- implement strategies to create functional treatment plans for individuals with TBI

PROGRAM HISTORY and IMPORTANT INFORMATION

Recording length: 69 minutes
Online conference dates: March 18–30, 2020; December 2–14, 2020
End date: March 18, 2025

To earn continuing education credit, you must complete the learning assessment on or before March 18, 2025.

This course is offered for 0.1 ASHA CEUs (Intermediate level, Professional area).
