Enhancing Clinical Practice With Effective Stroboscopy Interpretation

INTRODUCTION

This session describes how to evaluate stroboscopy results using a new visuoperceptual assessment tool—the Voice-Vibratory Assessment with Laryngeal Imaging (VALI) rating form. The speaker also discusses how to integrate the results from stroboscopy into treatment planning and execution.

This course is a recorded session from the 2020 online conference “Voice Evaluation and Treatment: Improving Outcomes for Children and Adults.”

LEARNING OUTCOMES

You will be able to:

- Describe the difference between endoscopy and stroboscopy
- Describe the appropriate tasks for various endoscopic and stroboscopic parameter evaluation
- Identify how to use stroboscopy results for treatment purposes

PROGRAM HISTORY and IMPORTANT INFORMATION

Recording length: 80 minutes
Online conference dates: April 22–May 4, 2020; August 5–17, 2020
End date: April 22, 2025

To earn continuing education credit, you must complete the learning assessment on or before April 22, 2025.

This course is offered for 0.1 ASHA CEUs (Intermediate level, Professional area).
