Accessible, Low-Cost Methods for Voice Assessment

INTRODUCTION

This session shares low-cost and accessible methods for voice measurement that clinicians in any work setting can use as part of a voice assessment for adults and children. These assessment methods address the impact of vocal issues on activities of daily living, allow individuals to report voice changes over time, and aid clinicians in developing treatment goals and measuring outcomes.

This course is a recorded session from the 2020 online conference “Voice Evaluation and Treatment: Improving Outcomes for Children and Adults.”

LEARNING OUTCOMES

You will be able to:

- Identify key components of a voice assessment that identify the presence or absence, nature, and severity of a voice disorder
- Identify basic equipment necessary for a voice assessment in a variety of settings
- Describe appropriate measures of voice used to test hypotheses about and track voice change over time as well as those related to treatment

PROGRAM HISTORY and IMPORTANT INFORMATION

Recording length: 113 minutes
Online conference dates: April 22–May 4, 2020; August 5–17, 2020
End date: April 22, 2025

To earn continuing education credit, you must complete the learning assessment on or before April 22, 2025.

This course is offered for 0.15 ASHA CEUs (Intermediate level, Professional area).
