Overcoming Challenges in Pediatric & Adult Cochlear Implant Users With Exceptionalities

INTRODUCTION

Children and adults who use cochlear implants and have additional exceptionalities present challenges in diagnostic testing and therapeutic intervention for speech-language pathologists and audiologists. This session reviews current research on communication and quality of life in this population, while also highlighting real-world clinical practices in assessing, treating, and defining success in these patients.

This course was presented and recorded at the 2019 ASHA Convention. The session was developed by, and presenters invited by, Audiology Implantables.

LEARNING OUTCOMES

You will be able to:

- describe cochlear implant outcomes for adults with additional exceptionalities
- describe cochlear implant outcomes for children with additional exceptionalities
- describe intervention and clinical recommendations for cochlear implant recipients with additional exceptionalities

PROGRAM HISTORY and IMPORTANT INFORMATION

Recording length: 51 minutes
ASHA Convention session date (session #1058): November 21, 2019
End date: November 21, 2024

To earn continuing education credit, you must complete the learning assessment on or before November 21, 2024.

This course is offered for 0.05 ASHA CEUs (Intermediate level, Professional area).
