Factors That Exacerbate or Ameliorate Listening Effort in Children Who Are Hard of Hearing

FACULTY

Elizabeth Walker is an assistant professor in the Department of Communication Sciences and Disorders at the University of Iowa and Director of the Pediatric Audiology Laboratory. Her NIH-funded research focuses on pediatric aural habilitation, specifically examining malleable factors that relate to individual differences in listening and language outcomes for children who are deaf or hard of hearing.

Financial Disclosures:
- NIH and ASHF grant funds
- Received ASHA registration waiver due to role as topic chair

Nonfinancial Disclosures:
- No nonfinancial relationships relevant to the content of the session

Erin Picou is a research assistant professor in the Department of Hearing and Speech Sciences at Vanderbilt University Medical Center and Director of the Hearing and Affect Perception Interest Laboratory. Her research, funded by a variety of industry and federal sponsors, focuses on the effects of hearing aids on communication for adults and children with hearing loss.
