An Interdisciplinary Perspective on Management of Patients With Dizziness & Balance Disorders

INTRODUCTION

This session provides an interdisciplinary (audiology, otology, and physical therapy) perspective on management of patients with dizziness, specifically geared toward cutting-edge management techniques and recommendations for care. The panel presentation discusses surgical and nonsurgical approaches and clinical cases to highlight patient benefits and improved clinical outcomes. A question-and-answer period concludes the presentation.

This course was presented and recorded at the 2019 ASHA Convention. The session was developed by, and presenters invited by, Hearing, Vestibular, Tinnitus - Assessment and Intervention: Adult.

LEARNING OUTCOMES
You will be able to:

- identify optimal strategies for diagnosing vestibular disorders
- describe advances in vestibular rehabilitation for adult patients with dizziness and imbalance concerns
- discuss team approach (audiology, otology and physical therapy) in rehabilitative care for patients with vestibular disorders

PROGRAM HISTORY and IMPORTANT INFORMATION

Recording length: 124 minutes
ASHA Convention session date (session #1251): November 22, 2019
End date: November 22, 2024

To earn continuing education credit, you must complete the learning assessment on or before November 22, 2024.

This course is offered for 0.2 ASHA CEUs (Intermediate level, Professional area).
