Evidence to Support Improved Outcomes for Older Adults From Dual-Task Training Through Interprofessional Collaboration by Lisa Milliken and Neely Sullivan

An Exploratory Survey Study of Grand Rounds as an Interprofessional Education Tool for Graduate Students in the Health Professions by Mahchid Namazi, George P. Holan, Sharon E. McKenzie, Prisca O. Anuforo, Jennifer A. Pax, Laurie Knis-Matthews, and Donald R. Marks
INTRODUCTION

These Perspectives (SIG 2) articles evaluate, highlight, and analyze various examples of interprofessional education and collaboration amongst speech-language pathologists and other professionals. Interprofessional educational models, collaborative teaming frameworks, and a case study example are also presented.

LEARNING OUTCOMES

You will be able to:

• describe a framework that utilizes team-based interprofessional education for speech-language pathology and audiology students
• discuss the steps taken to establish an interprofessional, collaborative dining culture change within a skilled nursing facility and the impact on resident socialization, communication, and dysphagia
• describe the interprofessional clinical model utilized to co-deliver integrative music and language therapy
• discuss implementation of a combined clinical placement for speech-language pathology and dietetics and nutrition students
• identify recommendations for best practices using dual-tasking interventions for improved clinical outcomes
• identify the main components of interprofessional education at Kean University

PROGRAM HISTORY

Start date: September 26, 2019
Available through: September 24, 2022

IMPORTANT INFORMATION

To earn continuing education credit, you must complete the test with a passing score on or before September 24, 2022.

This course is offered for 0.30 ASHA CEUs (Intermediate level, Professional area).
