INTRODUCTION

These Perspectives (SIG 3) articles provide a comprehensive update on evaluation and management of unilateral vocal fold paralysis. Multidisciplinary evaluations are addressed in addition to various medical and behavioral treatment options.

LEARNING OUTCOMES

You will be able to:

- discuss the basic pathophysiology of unilateral vocal fold paralysis as well as the different treatment options available
- describe considerations for voice therapy that guide expectations and decision making for patients with vocal fold motion impairment

PROGRAM HISTORY

Start date: September 23, 2019
Available through: September 21, 2022

IMPORTANT INFORMATION

To earn continuing education credit, you must complete the test with a passing score on or before September 21, 2022.

This course is offered for 0.10 ASHA CEUs (Intermediate level, Professional area).
