INTRODUCTION

LEARNING OUTCOMES
You will be able to:
- summarize the current dysphagia interventions currently used by speech-language pathologists, as described in the literature, who treat individuals with oculopharyngeal muscular dystrophy
- discuss the importance of learning to administer and interpret clinical cough assessments for individuals at risk of swallow impairment
- identify the predominant bolus hold pattern in healthy adults

CONTENTS

A Survey of Speech-Language Pathologists’ Experience With Clinical Cough Assessment by Michela Jean Mir and Karen Wheeler Hegland

Factors Influencing Oral Bolus Hold Type: Tipper or Dipper by Kendrea L. (Focht) Garand, Mary Catherine Reilly, Dahye Choi, Rajarshi Dey, Julie Estis, and Grayson Hill

PROGRAM HISTORY and IMPORTANT INFORMATION
Start date: December 20, 2021
End date: December 20, 2026
Dysphagia Revelations: What We Know We Don’t Know and What Is Normal for Swallowing (SIG 13)

To earn continuing education credit, you must complete the learning assessment on or before December 20, 2026.

This course is offered for 0.25 ASHA CEUs (Intermediate level, Professional area).
